

AZ1 – Connected Health

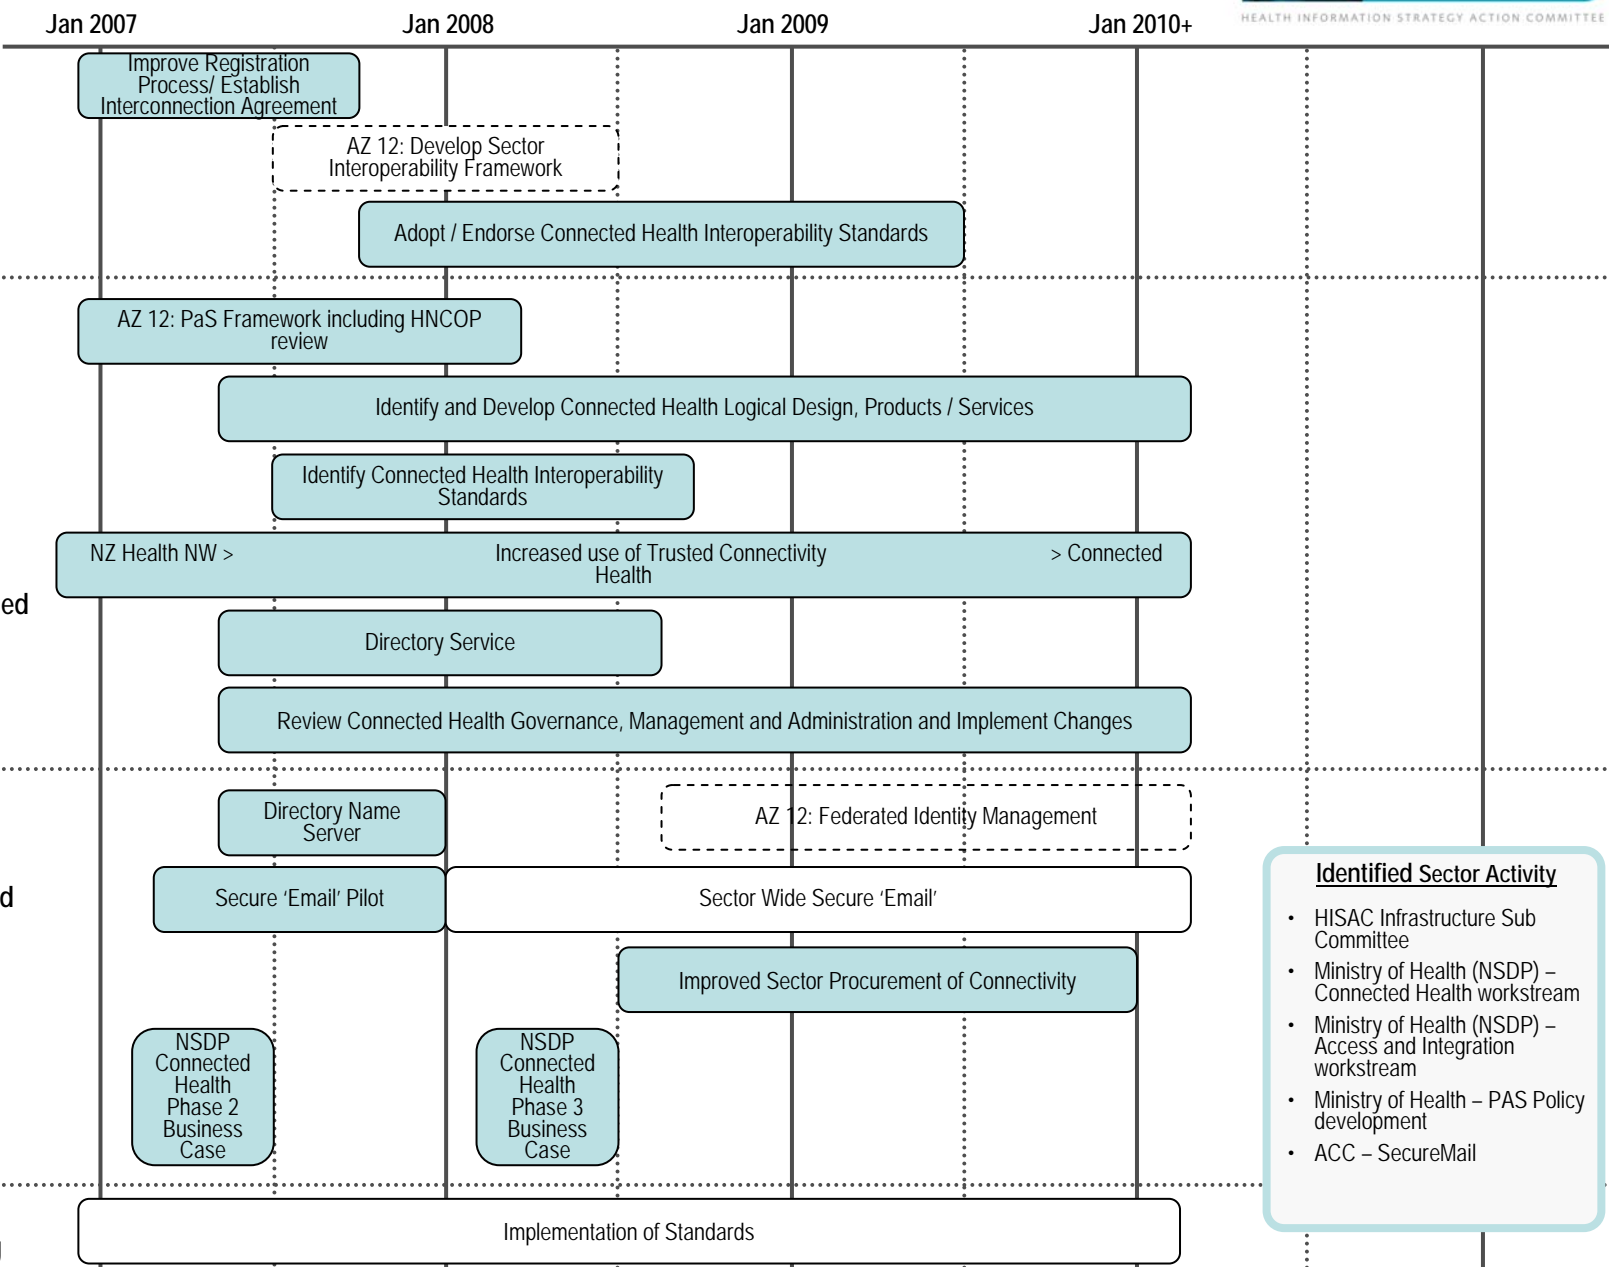

- Future State Features
 - ☞ A connected health and disability sector comprising existing physical networks that are trusted, reliable, and cost effective and which encourages the development and use of applications and services that facilitate health information sharing
 - ☞ Effective governance and management processes that ensure the application of appropriate standards, policies and audit processes
 - ☞ Appropriate privacy, authentication and security processes; including taking reasonable efforts to keep identifiable data private
 - ☞ Continual review and implementation of future appropriate technologies and services
- This roadmap focuses on:
 - ☞ Implementing the Connected Health Workstream of the National Systems Development Programme
 - ☞ Improving existing registration, administration and processes
 - ☞ Establishing a robust interconnection agreement for the current Health Network
 - ☞ Updating the current policies, standards and practices within the context of a framework for information sharing, specifically related to privacy, authentication, and security
 - ☞ Identifying and implementing the logical design and a range of services, including a number of priority fast track opportunities, that encourage and accelerate the evolution of the Connected Health vision
 - ☞ Promoting Connected Health and encouraging 'membership' of the connected community, and removal of barriers to further growth, including driving the uptake on the existing Health Network until such time as it is subsumed into a future Connected Health model
 - ☞ Leveraging the collective buying power of the sector to reduce the cost of access to health connectivity

AZ 1: National Network Strategy

HIGH

HISAC Involvement

LOW

- Identified Sector Activity**
- HISAC Infrastructure Sub Committee
 - Ministry of Health (NSDP) – Connected Health workstream
 - Ministry of Health (NSDP) – Access and Integration workstream
 - Ministry of Health – PAS Policy development
 - ACC – SecureMail
