

AZ9 – Outpatient Information

■ Future State Features

- ☞ Appropriate data elements and standards (including classification and clinical coding standards) to support both the clinical and the administrative information needs of Sector stakeholders;
- ☞ Appropriate standards and mechanisms for collecting validated, consistently formatted data in a timely fashion;
- ☞ Processes and supporting technologies that ensure practitioners and other stakeholders are provided with appropriate access to the data;
- ☞ Governance (ownership, stewardship, custodianship) of the Outpatient Information is clear and allows the information (and governance of it) to evolve over time;
- ☞ Appropriate reporting and data analysis functions;
- ☞ Inclusion of NHI and HPI identifiers

■ This roadmap focuses on:

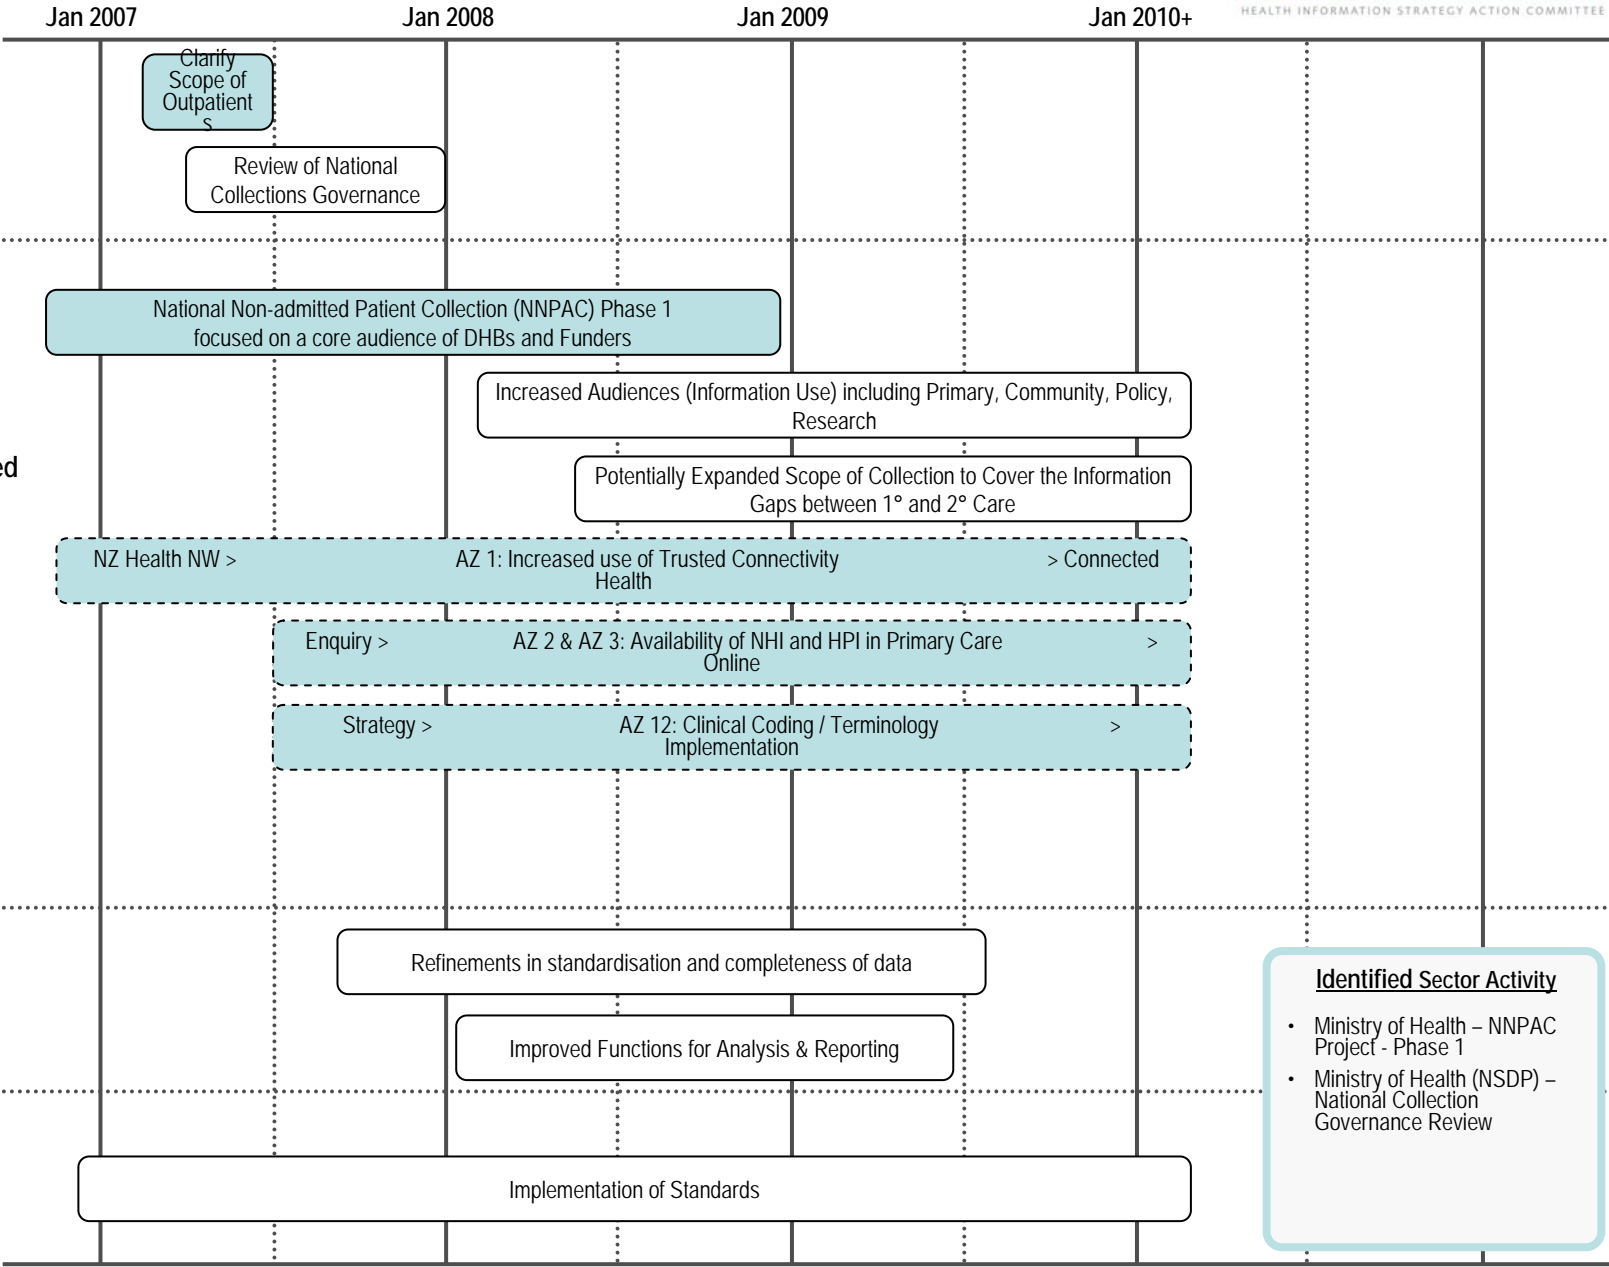

- ☞ Delivering the governance and operational platforms required to establish and manage the NNPAC outpatients information, and ensuring that data validation, error correction and transmission are as automated as possible
- ☞ Collect outpatients information more regularly so more up-to-date information is accessible
- ☞ Ensure that appropriate audiences have appropriate access to NNPAC outpatient information
- ☞ Progressively add value to the NNPAC outpatient information to meet the information needs of an expanded target audience
 - ✓ Increasing the standardisation of purchase unit definitions and units of measure, giving priority to high-volume purchase units
 - ✓ Increasing the completeness of data, in particular addressing cases where purchase unit information is difficult to collect
 - ✓ Ensuring the information needs of ACC are met
 - ✓ Include the HPI identifiers as the HPI system becomes ready and DHBs are able to support its use
 - ✓ Assess the feasibility of expanding the breadth of the collection to include community and domiciliary purchase unit information
 - ✓ Assess the feasibility of incrementally implementing clinical data capture within outpatient information directly from source and/or from linkages such as NHI and other methods of identification

AZ 9: Outpatient Information

HIGH

HISAC Involvement

LOW

Identified Sector Activity

- Ministry of Health – NNPAC Project - Phase 1
- Ministry of Health (NSDP) – National Collection Governance Review

Key: Active or Planned Future Initiatives / Projects Not core to this Action Zone but strategically important
